Lock Bumping –

Lock Bumping has become a legitimate security threat as information on the topic has become widely exposed in the news media and on the internet.

In response to this threat, The Master Lock Company developed exclusive patent-pending BumpStop® Advanced Technology that prevents the transfer of force from the bump key to the pins and blocks rotation of the cylinder. With a reverse rake tapered driver pin, high performance spring and precision tolerance chamber, our 4, 5 and 6-pin BumpStop® products resist bump attacks.

Keying Options

- **Keyed Alike (KA)** - This provides insame keyin convenience and eliminates the need for multiple keys where numerous padlocks are used. All padlocks in the set are keyed the same. Most Master Lock padlocks can be ordered keyed alike. Keyed alike padlocks are listed in this price book with a "KA" suffix in the product number.
- **Master Keyed (MK)** - In a master keyed system, the master key opens all locks in the system although each lock has its own unique key. Master keyed items are ideal for permitting supervisory or emergency access. Master keyed padlocks are listed in this price book with an "MK" suffix in the product number.
- **Rekeyable Padlocks** - Padlock cylinders can be removed and replaced to restore security quickly without requiring a new padlock. This is ideal for situations where keys are lost or stolen due to theft or employee turnover. Rekeyable padlocks are found on pages 27-28.
- **Reserved Key Systems (RSV)** - Reserved key padlocks are not available to the general public and are not listed in this price book. Key blanks and cut keys are supplied directly by Master Lock through distributors and dealers when requested by registered end users. This adds security through the restricted distribution of duplicate keys. This option requires a custom quotation (see page 1).
- **Edge® Key Control** - Keys for this patent pending key control product offer the ultimate protection against unauthorized duplicate keys. Blank keys are available to locksmiths only and controlled by contract. These keys are recommended for all master keys applications. Contact your local locksmith for full details.
- **Non-Removable Key (NR)** - The key cannot be removed from the padlock when the padlock is open. This helps prevent users from accidentally leaving the padlock in the open position. Only selected padlocks offer this option.

KEY CHARTING

- Customers can benefit fully from the large Master Lock change key ranges by having us chart your keying system for you. We will keep a complete record of the progressive key codes assigned and manufactured into your padlocks for each order. You will be assured that there is no unwanted key duplication with the padlocks you purchase over time. Be sure to request this special service with your next order so that all locks purchased from that point forward will be manufactured to comply with your key system requirements. Any orders placed by an end user or distributor should note that they are on a key charting system or reference their End User I.D. Number.
