## Commercial Hinges

---

Whenever possible, Hager Companies employs the latest technologies in metal finishing to provide the best long-term performance for our customers. Some finishes may not comply completely with BHMA (Builders Hardware Manufacturing Association) Standard A156.18 specifications with regard to plating process. However, they match BHMA color standards and exceed all BHMA performance criteria with regard to such tests as salt spray corrosion resistance, ultraviolet light deterioration resistance, solvent resistance, perspiration resistance, and finish hardness. For the convenience of our customers, we refer to the most appropriate finish symbols to indicate similarity of appearance using BHMA standard nomenclature including the "US" and numerical designation. Dissimilar metals are plated to match or be compatible to the finishes indicated. Finish numbers indicated on each product are the most equivalent to the old "US" symbol numbers and carry the BHMA finish symbol in parenthesis adjacent to the finish: Example — US3 (605) - Bright Brass or US26D (626) - Satin Chrome.

Hager's finishes are durable, high quality finishes obtained by careful processing of steel, brass, and stainless steel materials. It is important to consider usage and climatic conditions when selecting finishes. This is especially true in areas subjected to strong corrosive chemical conditions, humid climate or salt air which may have a damaging effect on metal finishes in a very short period of time. The longevity and preservation of the finish appearance are determined by base metal and finish process.

Care and maintenance of clear protective coatings or other organic finishing applications may require different methods of cleaning and care. As an example, all hardware finishes should not be cleaned with solvents or abrasives; surfaces should periodically be cleaned with a mild, non-abrasive soap and dried lightly with a soft, clean cloth. The type of base material and finishing techniques must be considered when applying any cleaning or preservative method. Contact Hager's Sales and Service Department for further information on the care of hardware finishes.

Note: Hager only warrants US10B finish over brass or bronze base material. If steel base material is necessary, Hager recommends US10A lacquer finish.

### **HINGE ADDITIONS/MODIFICATIONS**

# Roton Continuous Hinges

## HOW TO ORDER:

**Example:** 780-112HDFFUL 119" CLR 1 PK

**Stock Number:** 184038

**Item Number:** YS 1121190CLR000001 Rev. S

## INTRODUCTION

Hager Roton hinges are unique, aluminum geared hinges developed to outperform most other entrance components because the weight of the door is distributed along the full length of the door frame.

Roton continuous hinges have been utilized in hospitals, schools, hotels, offices, airports, stadiums, storefronts, and commercial and industrial buildings in new construction and retrofit applications for over 30 years.

Hager Roton continuous geared hinges are designed for superior performance. Because of this, we offer our lifetime warranty with confidence.

## ANSI Standards

- 780 Series Roton continuous geared hinges are approved per ANSI A156.26 Grade 1 for 150 lb. doors
- 780 Series Roton heavy duty hinges are approved per ANSI A156.26 Grade 1 for 300 lb. doors
- 780-111, 780-112, 780-124HD, 780-224, 780-226 standard duty and heavy duty Roton continuous geared hinges are Warnock-Hersey certified in accordance with ANSI A250.13 2003 Standard Severe Windstorm Resistant Components.

## Lead Times

Stock items will typically ship in five working days or less from the order entry date. Made-to-order items will typically ship in 15 working days depending on seasonal volume and order complexity. Special orders including industrials, special machining, and large quantities may need to be scheduled. The anticipated ship date will be included with each order acknowledgement. Please contact Customer Service if product availability is in question.

## Quick Ship

Products denoted with **red and bold** pricing are available to order through the Quick Ship program and ship within 24 hours. When ordering these products please visit [www.hagerco.com](http://www.hagerco.com) and log in to MyHager to access the 'Quick Ship' portal. Due to the promptness of the fulfillment process, Quick Ship orders are non-cancellable.

## Cancellation Notification

Cancellation for made to order items must be completed within 48 hours of order placement.

### Standard Lengths

Roton hinges are listed and priced as actual lengths 79" (6'8" opening), 83" (7'0" opening), 85" (7'2" opening), 95" (8'0" opening), and 119" (10'0" opening) for convenience in application to nominal sized doors. Actual length provides for threshold clearance, head clearance and door height allowances for carpeting. Other lengths may be ordered as non-standard items.

### Special Lengths

Should a non-standard length be required, please price as the next standard length. (For example, if 86" length is required, use 95" list price.)

### Length Specifications

If special lengths to match the actual net door heights are required, please indicate this clearly on your order. A special length should be specified from the net door height, not the nominal height of the opening. To order specify: "Actual Length", or "Net Door Height". Use pricing for the next longer standard length from which the special length can be manufactured. For example, hinges 86-3/4" long will be invoiced at the 95" price.

### Field Modifications

While Roton hinges can be cut in the field, any product modifications may void all warranties. Should in-the-field modifications be required, cut only from bottom of hinge. Do not cut through bearings or screw holes. When cutting electric hinges it is extremely important to clamp both hinge leaves securely to prevent hinge "chatter" which can damage the hinge's internal wiring. Consult the St. Louis sales office before proceeding.

### Template Hinges

Hager has developed templated hole patterns for Roton hinge models in standard lengths. Drawings are available upon request by contacting Hager Customer Service or accessing the Hager website at [www.hagerco.com](http://www.hagerco.com).

Due to normal variances inherent in the manufacturing process, Roton custom length hinges are deemed by Hager to be non-templated.

### Standard Finishes

Roton hinges are available in clear anodized satin aluminum (similar to US28), dark bronze and black exterior anodized coating.

### Special Products

A special product is any product not listed in the price book in regard to length, finish, standard hole preparation or leaf combinations not illustrated. Orders for special products are encouraged, but any changes or cancellations on special orders may result in charges related to work performed and/or material loss. Under no circumstance will non-stock or make-to-order products be accepted for return unless due to Hager error.

### MODIFICATIONS & ADDITIONS PRICE

### ADDITION TO LIST

#### Short Hinges

**\$22.30**

Hinges shorter than 79" will be invoiced at the 79" price. Where two or more short hinges can be obtained from a standard length, pricing is based on the number of standard lengths utilized plus an assembly charge for each hinge.

---

#### Extra Long Hinges

**\$97.50**

Hinges over 119" are manufactured as two separate lengths with a staggered joint for on-site connection. Hinge segments are taken from standard sizes for best economics in relation to the quantity required. Hanging specifications are required to position the cuts inconspicuously and to finish symmetrical pairs in double door applications.

---

#### Custom Hole Pattern

**Price on Application**

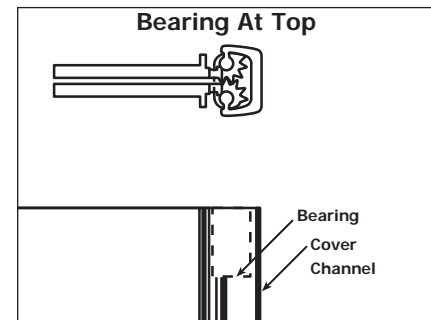

Any hinge may be ordered with special hole locations for unusual frame or door conditions. Please provide specifications for each leaf.

---

#### Bearing At Top

**\$41.50**

This application allows for the bearing to be set at the very top of the cover channel. The cover channel is flush with the top of the geared hinge, preventing any obstructions or debris from being inserted in the top of the channel.

#### 780 Series Concealed Molded Hospital Tip

**\$122.50**

780 Series Concealed and several Full Surface models can be prepared with a smooth tapered top bearing. This option is ideal for use in hospitals and correctional facilities to help provide a clean and safe environment. For Roton® Ligature-Resistant Opening Solutions see our TIPIT® section below. Not compatible with the round back cover channel option. For complete list of compatible models for this option, please reference chart on page 13.

## **INTRODUCTION**

Hager Companies offers a variety of locks to meet a wide range of applications and solutions. Heavy Duty Grade 1 deadlocks, cylindrical locks, and mortise locks are ideal for schools, hospitals, and other high-use environments. Grade 2 deadlocks and cylindrical locks are ideal for less abusive environments, while Grade 2 tubular locks are suitable for heavy duty residential or medium duty commercial environments.

All Hager locks have been rigorously tested and certified to the highest standards. Most lock series are BHMA certified per the ANSI A156.2 standards. They are also UL/cUL Listed for all functions up to and including 3 hours for "A" labeled doors. In addition to the certifications, all Hager leversets are ADA compliant and most come with a lifetime warranty.

Most Hager locksets are either non-handed or field reversible in the case of the 3800 Series mortise lock. Conventional cylinder and small format interchangeable core are available on keyed functions. Most lock series offer three lever style options. Please check appropriate section for series specific options.

## INTRODUCTION

Hager door controls offer architects, contractors, and building owners a superior product with proven reliability. In fact, our 5100, 5200, and 5300 Series Grade 1 models are the only closers in the industry that are both BHMA certified and backed by a lifetime warranty. That makes them a no-risk choice for virtually any building type.

With Hager, you get door controls that are packaged with everything needed for quick installation, regardless of the application. Hager door closers are tri-packed for mounting three ways: parallel arm, regular arm, and top jamb. They are non-handed, packaged with a parallel arm bracket and thru-bolts at no extra charge, and adjustable for various door sizes.

### ADA (Barrier Free) Door Closers:

Any certified BHMA/ANSI A156.4 door closer, regardless of manufacturer, that is installed and adjusted based on ADA or other reduced opening force requirements may not provide sufficient power to reliably close and latch a door.

If arms are ordered separately, there will be a significant difference in price than if purchased with a closer as a complete assembly. Adders are listed below. Add the list price of the option to the list price of the closer and take standard discounts.

### ADA (Barrier Free) Door Closers:

Any certified BHMA/ANSI A156.4 door closer, regardless of manufacturer, that is installed and adjusted based on ADA or other reduced opening force requirements may not provide sufficient power to reliably close and latch a door.

If arms are ordered separately, there will be a significant difference in price than if purchased with a closer as a complete assembly. Adders are listed below. Add the list price of the option to the list price of the closer and take standard discounts.

Delayed Action Valve	<b>17.70</b>
Lead Lined Cover	<b>111.40</b>
Check with factory for pricing and availability of plated products.	<b>POA</b>

To figure the list price of a door protection plate, find the hundred square inch size on the chart above. For odd or fractional sizes use the next higher price (i.e. 8" x 31-1/2" - price as 8" x 32" = 2.56 sq. inches). Multiply the square inch size by the list price (for example, 2.56 sq. inches x US\$31.10 = \$79.62 list).
